

NENCY ANGHAN

Android Developer | Data Analyst

Auckland, New Zeland | 022 423 8082 | nencyanghan10@gmail.com

CAREER OBJECTIVE:

As a passionate Android Developer skilled in Java, Kotlin, and Android SDK, I focus on creating high-quality, scalable apps that offer seamless user experiences. Additionally, as a results-driven Data Analyst with expertise in Python, SQL, and data visualization, I excel at turning complex data into actionable insights that drive business success and support decision-making. Eager to contribute my technical expertise and problem-solving skills to a forward-thinking company.

SUMMARY:

- I have 3+ years of experience in Mobile Application Development.
- Highly motivated and focused on the Design and Development of Android applications.
- Responsible for designing the user interface, build, deployment, debug & maintenance of Android applications for Google Play
- Analyze data related to competitors' apps, including user ratings, installs, and features.
- Analyze in-app purchases, ads, and other revenue-related data to understand the app's financial performance.
- Manage app updates, live performance monitoring, and in-app purchases through the Google Play Console. Create app info, set package names, and ensure seamless deployment while complying with guidelines and user feedback.

WORK EXPERIENCE:

Easydrop Infotech

Project Leader | Data Analyst | December 2023 - January 2025

- Assign development tasks to team members based on their skillsets and project requirements.
- Identify trending and high-demand app ideas using data analytics tools.
- Analyze user data, competitor apps, and market trends to guide development strategy.
- Maintain documentation and reports on development and analytics outcomes.
- Track app performance, crash reports, and user reviews via Google Play Console and analytics tools.
- Shortlist apps based on installs, user ratings, reviews, and market gaps.

Technomargin Solution

Android developer | junior Data Analyst | September 2022 - November 2023

- Understand project requirements and define app features, functionality, and user flow.
- Write clean, efficient code in Java/Kotlin to implement app functionality.
- Set up and manage in-app purchases and subscriptions.
- Use insights to improve UI/UX, performance, and feature set.
- Ensure compliance with Google Play policies and guidelines.
- Integrate APIs, databases (e.g., Firebase), and third-party libraries as needed.
- Upload builds, manage app versions, and publish updates to the Google Play Store.

Astha Technology Solutions Private Limited

Junior Android Developer | July, 2019 - September, 2022

- Write and maintain clean, efficient Java code for Android applications.
- Use Git for code versioning and collaborate with the development team.
- Continuously learn and adapt to new tools, libraries, and best practices in Android and Java development.
- Integrate REST APIs, libraries, and third-party services into the app.
- Work closely with senior developers, designers, and testers to deliver app features.
